STERLING EDITION

PRODUCT CATALOGUE

AS THE SEASONS SHIFT AND THE DAYS GROW SHORTER, PREPARATION BECOMES ESSENTIAL.

Here at Jefferson Tools, we understand the challenges that autumn and winter can bring, and this latest catalogue is designed to help you stay ready for whatever lies ahead.

Longer nights call for brighter, more reliable lighting solutions – whether on-site, at home or on the go. That's why we have expanded our HyperBeam range of powerful and energy-efficient lights, ensuring safety and productivity even after daylight fades.

FROM PAGE 126

**HYPER
BEAM™**

As the temperature drops, dependable heating becomes a necessity, not a luxury. Our variety of heaters have been built to deliver warmth and comfort in workshops, garages, warehouses and outdoor spaces, helping you keep working through the coldest months. We've extended our Inferno Infrared Oil Heater range with a 75,000 BTU option (page 85), providing another low noise, fuel efficient heating option.

Power outages are a nightmare in the cold season, so don't get caught powerless in the event of a storm. Our trusted generators are here to keep you running without interruption.

FROM PAGE 136

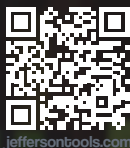

Autumn/Winter also brings its share of unpredictable weather. Flooding and excess water can strike suddenly, so our robust water pumps are here to provide fast, effective recovery and peace of mind.

CHECK OUT THE GROWING RANGE ON PAGES 238 – 241

THE NEXT SIX MONTHS DEMAND RESILIENCE, RELIABILITY AND PREPARATION.
Jefferson Tools is proud to equip you with the right tools to face the season with confidence.

SCREW AIR COMPRESSORS

- Oil cooled motor
- Coaxial all-in-one motor design
- Easy access maintenance
- Colour touch screen control pad
- Permanent magnet motor offers significant benefits over traditional induction motors, such as higher efficiency, reduced maintenance and lower heat generation
- Rotary screws provide efficient drive transmission that eliminates slippage
- Silenced cabinet minimises vibrations and ensures a quieter operation
- Air receiver ensures consistent airflow which helps to manage pressure peaks during operation
- Both models include castor wheel kit

HIGH VOLUME LOW PRESSURE (HVLP)

JEFA090B

1

- Designed for DIY and professional workshops and ideal for applying base coats and other high-pressure spraying applications
- Ideal for working with most low viscosity materials and suitable for metallic and water-based paints
- Produces a fine, controlled jet for smooth coverage and a great finish with reduced overspray

MEDIUM VOLUME MEDIUM PRESSURE (MVMP)

JEFA091G

2

- Designed for DIY and professional workshops and ideal for mid-pressure spraying applications on a variety of surfaces
- Uses standard pressure which creates a flat and smooth fan pattern ideal to get the best clear finishing coats
- Air cap supplies a strong mist pressure for fast application and extended working distance

LOW VOLUME LOW PRESSURE (LVLP)

JEFA092Y

3

- Ideal for working with thin and waterborne paints, stains, lacquers and varnishes
- Suitable for use with small and low-pressure compressors
- Produces a fine, controlled jet for smooth coverage and a superior finish

WHY CHOOSE CHROME MOLYBDENUM?

✓ HIGH STRENGTH & DURABILITY

High tensile strength which allows it to absorb the impact forces that are common in heavy-duty applications.

✓ DESIGNED FOR IMPACT WRENCHES

Our Tundra Cr-Mo sockets are specifically engineered to handle high torque conditions without breaking.

✓ RESISTANT TO DEFORMATION

Cr-Mo can be heat-treated to achieve a high level of hardness, which helps the socket maintain its shape and size even under high torque.

✓ CORROSION RESISTANT

The chromium in the alloy provides a level of corrosion resistance, which helps the sockets last longer, especially in harsh environments where they may be exposed to moisture, chemicals, or other corrosive substances.

✓ REDUCED SPLINTERING

Cr-Mo's toughness reduces the likelihood of breaking in a way that sends sharp pieces flying.

✓ TOUGH & DUCTILE

Cr-Mo is flexible under stress, an important attribute for sockets that need to withstand repeated impacts. The toughness ensures the sockets can endure many cycles of use, reducing the likelihood of cracks developing over time.

FEATURES

- Dual hole configuration and ring groove for effortless attachment and removal
- Manufactured from Chrome Molybdenum steel for extreme impact durability
- 6-Point gripping for best fit and exceptional durability and lasting performance in high-torque applications
- Laser etched part numbers
- Suitable for use on all types of impact tools
- Non-slip hex geometry prevents socket and fastener rounding
- Square drive

GAS/GASLESS MIG WELDERS (230V)

Our professional range of autoMIG welders all feature a heavy-duty high output transformer and forced air cooling to maximise duty cycle performance. Supplied set up in gas mode. Use in gasless mode will require the purchase of a spool of fluxed cored wire, a pack of 1.0mm tips.

- Portable MIG Welder
- Ideal for DIY & garage use
- Produces stable arc striking and minimal spatter
- Cooling System: Forced Air
- Torch: Non-live
- Wire Capacity: 5-15kg
- Gas Type: CO₂ / Argon Mix & Argon & CO₂
- Input Voltage: 230V Single Phase

JEFFERSON® WELDERS SHOULD BE FITTED WITH THE CORRECT PLUG. FAILURE TO COMPLY WITH THIS INSTRUCTION WILL VOID WARRANTY

Suitable for a wide range of welding jobs and widely used due to their reliability, these Jefferson MIG welders have a 35% duty cycle at rated output current and can weld without interruption for longer periods of time. The range includes 2-roll and 4-roll wire feeder options and each are fitted with anti-dust protection. Robust housing and complete with handle and castor wheels for manoeuvrability.

- Input: 230V / 32A
- Large cabinets allow for full height gas cylinders
- Heavy duty front and rear wheels
- Forced air fan cooling
- Double support straps for gas cylinder
- Variable wire speed
- Spot weld timer

TUNDRA AC/DC 320AMP TIG WELDER (3 PHASE)

KIT-TUNTIG320AC-DC

TIG AC/DC welding machines are specifically designed to achieve perfect aluminium and aluminium alloy welding with alternating current. In DC mode they can also weld other metals such as stainless steel, mild steel, alloy steel, titanium and copper alloys. Coated electrodes – MMA welding is possible in either AC or DC with digital polarity change. Switchable HF arc ignition, 2-step/4-step/two level 4-step mode, 500 Hz DC pulse, AC pulse, 4 different AC forms and memory for operator's own settings. Options include remote control, foot pedal and TIG cold wire feeder.

- Supply voltage: 415V
- Supply current: 32A
- Welding current: 5–320A
- Duty cycle: 35%
- DC pulse frequency: 0.5–500Hz
- AC frequency: 35–250Hz
- AC pulse frequency: 0.5–10Hz

SG2 SOLID MIG WELDING WIRE - 0.7KG, 5KG & 15KG

Mild steel welding wire is widely used in ship, vehicle, bridge, engineering machinery and various other fields. Mild steel welding wire is highly anti-corrosive, it uses CO₂ gas shielded welding and is widely applied in marine boilers, marine pipelines and marine cargo manufacturing industries. Our SG2 solid wire mild steel welding wire is coated with a copper layer for high anti-corrosion.

WELDING RODS

A versatile, deep penetrating steel electrode with smooth, stable arc characteristics. It is used for the welding of mild steels, galvanized and some low alloy steels. The coating produces a forceful, spray-type arc, resulting in deep penetrating welds. The slag is thin and easily removable.

Class E6013 blue rutile coated electrodes suitable for welding Carbon and C-Mn steels with medium mechanical properties. Typical Application: Vehicles, ship building and repair, sheet metal, build-up of over machined and worn mild steel surfaces, general light fabrication.

- Soft arc therefore suitable for relatively thin plates and bridging wide gaps
- All position electrode including vertical down
- Rutile general purpose

FEATURES

Designed for drilling holes in steel fabrication work. It is an ideal portable drilling solution equally suited for use in building sites or the workshop environment and can be used to cut in horizontal, vertical and overhead positions. The magnetic drill uses an annular hole cutter (sometimes called a slugger bit) to cut clean and accurate holes without pre-drilling or step drilling. After cutting through the steel the cutter produces a "slug" (a cylindrical lump of steel) that falls from the centre of the cut.

WHICH MATERIAL DO I NEED?

HSS

For general-purpose drilling. They are cost-effective and widely used for everyday tasks in wood, plastic, and some metals

M2

For more demanding drilling applications, such as drilling into harder metals like stainless steel, cast iron, and other tough materials

M35

For drilling into materials such as stainless steel, titanium, and other tough alloys. Often used in industrial settings where high performance and durability are required

INFRARED HEATERS

Infrared heating delivers fast, effective heat through the combustion of gases. The heat produced by infrared radiant energy, radiates downward warming objects such as the floor, machinery, tools and building components, as well as people in the room. Suitable for indoor and outdoor use, Infrared Heat replicates the feeling of warmth from the sun. Suitable for use with diesel, kerosene or paraffin fuel. Both designs include an LED thermostatic control with automatic cut-off for cost savings from reduced energy and fuel usage. Fitted with a timed ventilation system to help cool the combustion chamber. Designed with a tough powder-coated housing to enhance protection from the elements and the working environment.

SPACE HEATERS

When a direct oil heater is switched on the air fan draws in air, pressurises it and passes it through an air line to the burner head nozzle. The air flow causes fuel to be drawn from the tank. The fuel and air mix is then sprayed into the combustion chamber. The mixture is automatically ignited by the spark plug and a high temperature heat stream is generated in the combustion chamber. Air is drawn into the unit by a fan and is pushed around the cool chamber situated between the combustion chamber and outer casing. This fast flowing air sucks the heat stream out of the combustion chamber, providing the required heat.

- High air displacement
- Integral fuel gauge
- Thermal protection for motor
- Error indicator light
- Electronic flame control
- Durable steel construction
- Hard wearing, solid rubber wheels
- Fuel Type: Diesel/Kerosene/Paraffin
- Powder coated housing remains cool to the touch
- Adjustable thermostat to control heat output

ROTOMOULD INDUSTRIAL DRUM FANS

INDUSTRIAL

- The main body of the fan is manufactured using a rotational-moulding plastic construction, which allows for higher levels of endurance during extreme temperatures and rough impact in comparison to traditional thin metal drum fans
- The HDPE construction results in outstanding durability able to withstand the dust and debris in harsh environments for extended periods of time
- Manufactured from corrosion and impact resistant plastic
- Large wheels allow easy movement
- 3 fan speeds
- Easy to use, easy to clean
- Fan Type: Axial
- 110V and 230V Options
- 3m cable

WHY CHOOSE FIBREGLASS?

✓ NON-CONDUCTIVE

Ideal for use in environments where there is a risk of contact with electrical wires or equipment.

✓ WEATHER RESISTANT

Resistant to weather conditions, such as rain, sun, and extreme temperatures. They do not rust or corrode, making them suitable for both indoor and outdoor use.

✓ STRENGTH & STABILITY

Sturdy and can support heavy loads, fibreglass ladders are more rigid, offering better stability.

WORK PLATFORMS

- Fixed height, portable, hop-up work platforms
- Ideal for low-level access, painting, plastering, DIY or even washing the car
- Compact & robust design with large non-slip platform area
- Broad sturdy base with non-slip rubber feet
- Fold-flat design for easy assembly, transportation & storage
- Easy locking catch mechanism for safe use

- Designed for easy interlocking installation, often not requiring adhesive, which can save time and effort
- Highly durable and resistant to heavy loads, making them ideal for garages where vehicles and heavy equipment are stored
- Resistant to chemicals, oils, and other automotive fluids, ensuring longevity and easy maintenance
- Textured surface that provides excellent slip resistance, improving safety in the garage
- Softer and more comfortable surface to stand on compared to concrete, reducing fatigue during long periods of standing
- Thermal and sound insulation, making the garage warmer and quieter
- Easy to clean and maintain; can be wiped or mopped
- Less prone to cracking or breaking compared to ceramic tiles, providing a longer-lasting solution
- Waterproof to prevent issues related to moisture, such as mould or mildew

CORNERS & EDGING

- Ramped corners & edging to finish off exposed tiles safely in doorways or round free standing areas
- They can be fitted quickly and easily in the same way that the tiles interlock creating a safe edge for pedestrians and vehicles to move on and off PVC floor

KNEELING MATS

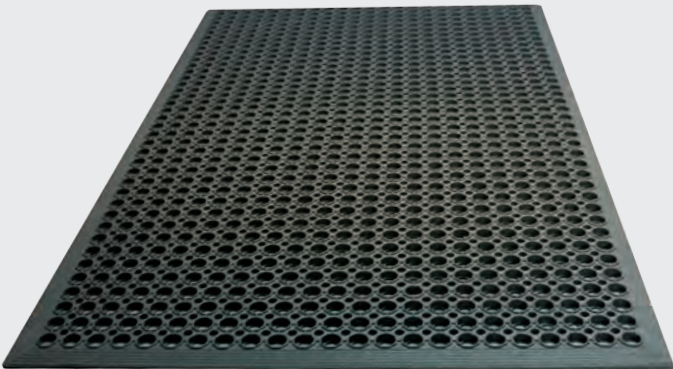

- Thick EVA material
- Oil & water resistant
- Reduces stress and discomfort often felt in kneeling jobs
- Its durable and comfortable design makes it the perfect addition to any working environment

Our new Jefferson 5.0kW Diesel Generator is your number one choice for sub 10kW standby power. Its compact design, low noise output and consistent clean power output makes it ideal for home or business use. Providing 5.0kW/6.3kVA power, it's versatile design makes it perfect for back-up power to your home, workshop or for use around your farm or business. For farming and agricultural applications, the 5.0kW generator can be easily transported for off-site repairs or maintenance work and can power welders, compressors, power tools and much more.

Our Industrial & Professional cable reels are rated as IP44

What is IP44?

IP codes refer to the degree of protection against intrusion of solids or water in electrical enclosures. An IP44 rating indicates protection against most wires, screws, tools, fingers and water splashing against the enclosure from any direction.

DIAMOND CUTTING BLADES

- Engineered with an extended service life in mind
- Increased diamond density and segment heights improve performance over many of our competitors, 10mm segment height on our 4½" and 9" blades and 12mm on the 12" blades and 14" blades, greatly increases the lifespan of our blades
- Many of our competitors use between 5 to 10mm for similar sized blades

INDUSTRIAL CUP BRUSHES

For jobs requiring the removal of rust and other corrosion from metal surfaces, our cup brushes are a fast and efficient solution. They are also well suited to the removal of paint or similar surface coatings. While best results are found when used on metallic surfaces, they can be used on others but we would advise that you test a small area first.
