

PENETRATING OIL WITH PTFE & SMART STRAW 500ML

JEFSPR09

- Blend of solvent, which assists in penetrating even the most inaccessible areas to free threads on nuts, bolts, fittings and components
- Ideal for use as a dismantling fluid as it contains special extreme-pressure lubricants that enable components to be stripped and reassembled without wear, thread distortion or seize up
- Contains a moisture displacing additive which is designed to repel water, moisture or damp, making it ideal to protect vehicle electrical systems and outside electrical components on plant, equipment and buildings
- Ideal for use as a general-purpose maintenance spray for moving parts such as hinges, locks, chains, tools and equipment
- Folding precision straw
- Weight: 0.495kg
- Dimensions: 230 x 70 x 65mm
